## Excellent Brick and Structural Steel building!

Currently being used as a daycare center this building would be excellent for many uses. Built out with offices and conference room in front, large center “rec area” and classrooms around the perimeter (with exterior doors), additional offices and storage in the back of the building. ADA compliant restrooms (4 on site). Hard wired fire alarm and emergency lights, fully sprinkled. Some exterior work need, paint, roof, but underlying structure is concrete block and steel beams. Ample parking (gravel lot) with driveway around the building (makes for easy in/out traffic.

Building available for occupancy Fall 2020
